RE2 Unit 6 · 作业 1 · Unit 6A Lesson 1（词汇 + 视频课后）

After 6A1 · Cities Beneath the Sea — Words & Video | 40 minutes | Name: _____ Date: _____
Each reading question has a **strategy label**. Your teacher marks each strategy separately, so you can see which reading action is getting stronger.

Part A · Words — 30 marks

A1 Word bank — write each word next to its meaning — this unit — 8

brilliant · shallow · occupy · construct · conservation · pollution · remarkable · negative · release · chemical (two words are extra)

1. very bright _____
2. not deep _____
3. to build _____
4. harmful or bad _____
5. taking care of the environment _____
6. to stay in and fill a place _____
7. dirty air or water _____
8. special and amazing _____

A2 Collocations — complete with *effect · meaning · response · thoughts* — 4

9. Playing games late at night can have a negative _____ on your sleep.
10. The word *skinny* has a more negative _____ than the word *slim*.
11. There was a largely negative _____ to the government's new plan.
12. Negative _____ can affect an athlete's performance.

A3 Word parts — *un-, -ful, re-* — 6

13. Some reefs have lived for **uncounted** generations. *uncounted* = _____
14. Each reef is full of **colorful** fish. *colorful* = _____
15. Given a chance, coral can **rebuild**. *rebuild* = _____

A4 Words in context — circle the correct option — 6

16. If you **release** a fish you caught, you *keep it / do not keep it.*
17. If you **construct** a house, you *build it / buy it.*
18. If you **occupy** a place, you *stay there / leave there.*

19. In a city with high **pollution**, the air is likely to be *very clean / very dirty*.

20. A colour described as **brilliant** is probably very *bright / dark*.

21. People often create **chemicals** in a *library / science lab*.

A5 Old words — you met these in earlier units

Unit 2 & 3 review

6

aware · complex · impact · cause · effective · indicate

22. Warmer water is one _____ of coral bleaching.

23. Most swimmers are not _____ of how old a reef is.

24. A reef is a _____ home for thousands of animals.

25. New rules have had a real _____ on the number of fish.

26. Cleaning the water is an _____ way to help coral.

27. White coral can _____ that the water is too warm.

Part B · Reading

45 marks

A new text — you have not seen it before. Read it once, then answer.

The Forest in the Water

Along many warm coasts, short trees grow with their roots in salt water. People call them mangroves. Their roots look like thin legs holding the tree above the sea, and thousands of small fish live safely between them.

Mangroves do quiet work for the people who live nearby. Their roots hold the soil in place, so heavy waves cannot wash the land away. When a big storm arrives, the trees slow the water down. As a result, houses behind a mangrove forest are often damaged far less than houses on an open beach.

Yet in many places these forests are disappearing. Farmers cut the trees down to build ponds for shrimp, because a shrimp pond earns money quickly. Once the trees are gone, the soil washes away, and the fish that grew up among the roots have nowhere to hide. Consequently, the local fishing boats come home with less and less.

Some villages have started to plant young mangroves again. It is slow work, and a new forest takes years to grow. But in one village in Thailand, the fish returned four years after planting began — and so did the fishermen.

1. Main idea

strategy: main idea

6

What is the text mainly about?

a. how to grow shrimp in ponds b. why mangroves matter and what happens when they are cut down c. the best beaches in Thailand

2. **Cause and effect** strategy: cause-effect 7

According to paragraph 2, what happens *because* mangrove roots hold the soil?

_____

3. **Cause and effect** strategy: cause-effect 7

Farmers cut down mangroves. The text gives **two** effects of this. Write them.

Effect 1: _____

Effect 2: _____

4. **Detail supports a claim** strategy: detail 6

Which detail shows that replanting can work?

a. A new forest takes years to grow. b. In one village in Thailand, the fish returned four years after planting began. c. A shrimp pond earns money quickly.

5. **Signal words** strategy: cause-effect 7

Find **two** words or phrases in the text that signal a cause-and-effect relationship.

_____ _____

6. **Reference** strategy: reference 6

In the last paragraph, "**It** is slow work" — what is *it*?

_____

7. **Vocabulary in context** strategy: guess from context 6

"…houses behind a mangrove forest are often **damaged** far less…" *damaged* here means:

a. made bigger b. harmed or broken c. painted again

Part C · Write 25 marks

Write **three sentences** about one thing that has a **negative effect** on nature where you live — and one thing people could do about it.

Use at least **two** of these words: *negative · pollution · conservation · release · occupy.*

Frame — you may use it:
Idea: In my city, _____ has a negative effect on _____.
Reason: This happens because _____.
Action: One thing people could do is _____.

Before you hand it in — tick what is true

□ I used the target word(s) the task asked for.
□ My paragraph has an idea, a reason, and an example.
□ I read it once more and fixed anything that did not make sense.
